- 3-c New Officers Colony, Patiala

EDUCATION

Till class 10th
BRITISH CO-ED HIGH SCHOOL • 95.6%

class 11th and 12th
GURU NANAK FOUNDATION • 91.4%

2023-2027
THAPAR INSTITUE OF ENGINEERING AND TECHNOLOGY

- Bachelor of Technology
- GPA: 9.49 / 10

SKILLS

- Project Management
- Teamwork
- Time Management
- Leadership
- Effective Communication
- Critical Thinking
- Keen Perceptive

LANGUAGES

- English (Fluent)
- Hindi (Fluent)
- Japanese (Basic)

PROGRAMMING LANGUAGES

- C
- C++ (OOPS and DSA)
- Java (basics)
- Python
- SQL
- Frontend (HTML, CSS, JS)
- Backend (Node, Express, EJS)
- React
- Network hacking basics

PROFILE

A highly motivated Software Engineer with a strong foundation in project management, teamwork, and leadership, demonstrated through hands-on experience in college team projects. Skilled in problem-solving, programming, with proficiency in languages. Adept at time management, debugging, and critical thinking, ensuring efficient code and effective troubleshooting. Strong understanding of algorithms, data structures, and database management to develop optimized solutions.

PROJECTS

Portfolio Page
Technologies: HTML, CSS, JavaScript
- Created a personal portfolio showcasing all major projects with detailed descriptions and visuals.
- Designed a responsive interface for seamless viewing across devices.
- Implemented modular JavaScript for easier code management and interaction handling.

TaskSync – Team Task Management System
Technologies: HTML, CSS, JavaScript, Tailwind CSS, React, Vite, MongoDB
- Built a responsive task management platform with real-time updates.
- Implemented secure user authentication with admin token verification for role-based access control.
- Enabled task creation, assignment, and real-time tracking with status updates from all team members.
- Utilized MongoDB for efficient storage and retrieval of tasks, users, and activity logs.

Cryptocurrency Web App
Technologies: Html, React, CSS, JavaScript, API
- Created a live cryptocurrency dashboard showing top coins, price trends, and market stats, total market value.
- Integrated external APIs for real-time data, coin details, and news updates.
- Focused on responsive charts and interactive coin search.

Finance Management App
Technologies: React, Next.js, Tailwind CSS, TypeScript, Honojs, Drizzle ORM, Neon Database, Clerk Middleware
- Built a secure personal finance tracker with account-wise savings and expense monitoring.
- Track your money flow instantly through dynamic pie charts, bar graphs, and line trends.
- Used Clerk for user authentication and Neon DB for scalable data storage.
- Applied Tailwind for responsive design and Drizzle ORM and Hono for robust backend data handling.
