Profile

Computer Engineering undergraduate at Thapar Institute of Engineering and Technology with hands-on experience building production-grade AI applications and full-stack software. Experienced in Python, C++, React, Node.js, FastAPI, REST APIs, Docker, and MongoDB, with practical experience in LLMs, RAG, AI Agents, MCP, and AI workflow orchestration. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, and software engineering, with a passion for using GenAI to build scalable products and solve real-world problems.

Education

Thapar Institute of Engineering and Technology

GPA: 9.62 / 10

2023 – 2027

BE. Computer Engineering

Guru Nanak Foundation

Percentage: 89.4%

2021–2023

Senior Secondary

Technical Skills

Programming Languages: C++ (Advanced - OOPS & DSA), Python (Practitioner), Java (Basics), C

Frontend: React (Practitioner), JavaScript (Proficient), HTML, CSS, Tailwind CSS

Backend: Python, FastAPI, Node.js, Express, Flask (Practitioner), REST APIs

Database: SQL (Practitioner), MongoDB (Practitioner)

AI/GenAI: Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), AI Agents, Model Context Protocol (MCP), AI Orchestration, LangGraph, Prompt Engineering

Developer Tools: Git, GitHub, Docker, CI/CD, Selenium, NumPy, Pandas

Concepts: Data Structures & Algorithms, Object-Oriented Programming, Software Engineering, SDLC, Distributed Systems, Microservices, System Design, Debugging

Soft Skills: Problem Solving, Ownership, Autonomy, Continuous Learning, Adaptability, Collaboration, Communication, Critical Thinking

Major Projects

AI Orchestrator Platform | Python, Docker, LLMs, AI Agents, MCP, RAG, REST APIs (Personal Project)

- Designed and developed an AI-first workflow platform using Python, LLMs, RAG, AI Agents, and MCP to automate complex tasks and enterprise workflows.
- Built scalable backend services for intent analysis, task decomposition, intelligent routing, workflow execution, and response aggregation through REST APIs.
- Integrated document retrieval, semantic search, and reusable AI tools to enable intelligent information discovery and workflow automation.
- Containerized services with Docker and implemented authentication, logging, monitoring, and modular microservice architecture for reliable deployment.

TaskSync – Team Task Management System | React, Vite, JavaScript, Tailwind CSS, MongoDB (Personal Project)

- Developed a full-stack collaborative task management platform using React, JavaScript, Tailwind CSS, and MongoDB.
- Designed backend functionality for authentication, task assignment, progress tracking, and collaborative workflows.
- Implemented secure JWT-based authentication and role-based access control for different user roles.
- Built a responsive interface and modular application architecture focused on usability, maintainability, and scalable feature development.

Smart Contract Analyzer | Python, NLP, Machine Learning, React, Docker, LLMs, AI Agent

- AI-powered legal document analyzer that extracts, categorizes, and analyzes clauses from privacy policies, and TOS
- NLP-based clause classification and graph-based semantic clustering to group related clauses and improve comparison and organization of legal documents.
- Contributing to a risk-aware analysis pipeline that detects red-flag clauses, assigns severity levels, ranks critical provisions, and generates simplified insights for users.
- Integrating analysis capabilities into a user-facing web interface and browser extension for real-time legal document analysis and accessible decision support.

Experience

Software & AI Developer Intern

Jun 2026 – Jul 2026

CustomerNext Department, BusinessNext

Noida, India

- Developed production-grade AI applications using Python, FastAPI, REST APIs, Docker, and LLM technologies for enterprise software workflows.
- Designed scalable AI workflows integrating LLMs, RAG, MCP, and multi-agent orchestration to automate complex business processes.
- Built modular backend services with reusable components, authentication, logging, testing, API integrations, and CI/CD practices.
- Collaborated with senior engineers throughout the SDLC, taking ownership of features from implementation and debugging through deployment and production support.

Achievements

- Secured **96.4 percentile** in **JEE Main 2023** with an **All India Rank of 46,000** among 1M+ candidates.
- Awarded a **merit-based scholarship for three academic years** at Thapar Institute of Engineering and Technology for academic excellence.
- Solved **300+ DSA and competitive programming problems** on **LeetCode, GeeksforGeeks, and Codeforces**, maintaining consistent practice and contest participation.
